## Summer Green Smoothie Recipes:

You are free to use your own green smoothie recipes as long as they combine mostly greens and just a little fruit with 2 tablespoons chia seeds, water, and optional coconut oil or coconut milk. **BODYBOOST CLEANSE SUMMER LUNCH & DINNER RECIPE IDEAS:**

Feel free to make your own vegetable or bone broth based soups. Homemade soups are a healthy and low calorie option for those who are trying to optimize weight management or cleansing goals. Combine lots of vegetables with veggie broth/stock or bone broth. If you have a vitamix or high-powered blender, blending up a roasted butternut squash or broccoli (without cheese) into soups are a wonderful addition to our cleanse. Below, are some of our favorite soup and broth options.

- 1 pound of string beans
- 2 pounds zucchini
- 3 celery stalks
- a hand full of curly parsley
- enough water to cover your veggies

Directions: Add water, beans, zucchini and celery and boil for 10-15 min until fork goes through the outside of the zucchini. Add parsley and puree using the water you cooked it in and make it the consistency you desire.

### **Bone Broth:**

Tip: If purchasing a chicken or using turkey bones, roast the meat a day ahead and de-bone. Save the bones (or carcass) to be used for the bone broth. More information can be found on our website: [www.sonomaroots.com/blog](http://www.sonomaroots.com/blog)

Grilled zucchini and summer squash are so simple and delicious. Simply cut up veggies in pieces that won't fall through your grill. Place on grill and season with your favorite herbs. Some widely accessible herbs include rosemary, thyme, & sage!

## **BODYBOOST DESSERT:**

## **BODYBOOST CLEANSE TREATS & CHEATS**

Treats are allowed every couple of days, if necessary. While on the 10-Day BodyBoost cleanse, you should remain strict about avoiding certain foods like gluten-containing-grains, sugar and dairy. The following treats are allowed every couple of days if needed in the following order:

### **Allowed (best to worst)**

Coffee (black, no sugar or cream)  
Rice (can help curb sugar cravings)  
Beef – grass-fed, high quality

### **Avoid Throughout Cleanse:**

Sugar  
Gluten containing grains (wheat, rye, barley)  
Dairy – milk, cheese, yogurt, cottage cheese  
Alcohol  
Heavy fat meats (may cause diarrhea)

## **WEIGHT MANAGEMENT:**

For those looking to kick start a weight management program, we encourage our cleanse participants to download MyNetDiary or MyFitnessPal on their smartphones to modify and keep track of their daily caloric and fiber intake. Simply include your dietary intake each day and try to incorporate the weight management recommendations below:

**Calories: 1200-1500 as an average daily intake for females or 1500-2000 for males for weight management or weight loss.** To receive a more accurate and individualized caloric goal, input your basal metabolic rate (BMR) into your calculating app from a recent body fat analysis print out. See below for details.

**Fiber: 35-40 grams daily** for optimal weight management, hormonal health and bowel elimination. Chia seeds, flax seed and vegetables are the healthiest choices for fiber.

**Net Carbs: Total carbs – Fiber = Net carbs.** Aim for less than 50 net carbs daily. Grains, sugar, beverages, starchy vegetables and fruits are the biggest negative influences of net carbs. Modify smoothie recipes accordingly.

**Protein: 0.7g per pound of body weight for weight management or weight loss.** Dr. Danielle recommends this goal in order to build and maintain muscle mass. Keep in mind that not eating sufficient quantities of protein during a weight-loss program can cause muscle breakdown, which can contribute to difficult weight loss. Adequate muscle mass increases the metabolism of the body and makes weight easier to maintain.

If you are interested in finding out your percentage of body fat, lean muscle mass or basal metabolic rate (the amount of calories your body burns everyday while at rest), please contact Sonoma Roots to schedule your body fat analysis testing. If you are not near Sonoma, find a practitioner closest to you who performs BIA (Bio Impedance Analysis) or other forms of body composition testing, calipers are not recommended for these purposes.

There are many weight management products that can augment weight-loss goals and programs. During the cleanse, Dr. Danielle recommends holding off on implementing any new weight management products. Immediately following the cleanse is a great time to consider supplements and programs to help achieve a healthy weight. Our body boost cleanse, along with mild exercise, sauna use and Epsom salt baths provides a healthy foundation for preparing the body for a weight management program. After the cleanse, Dr. Danielle can discuss natural products, paleo or ketogenic diets, B-vitamin injections and other effective weight management modalities that best suit your needs.

## **SAUNA USE:**

If you have access to a far infrared sauna, Dr. Danielle recommends taking advantage the sauna during cleanse protocols to enhance the metabolic and elimination activities of the body. The skin is one of the main organs of elimination and our cleanse focuses on enhancing each route of detoxification and elimination, which are necessary components of the overall health of each individual.

Protocols for sauna use during a whole body cleanse are typically three times weekly for the duration of the cleanse in intervals that elicit a sweat response. For those new to dry sauna use, 15-minute intervals are recommended until a decent sweat is achieved in a 15-20 minute time frame.

## **UPON COMPLETION OF THE CLEANSE:**

Dr. Danielle recommends sticking to a healthier diet and lifestyle after completing the cleanse. Below, you will find her basic recommendations for a healthy lifestyle and daily detoxification.

- Water intake: ½ body weight in ounces each day.
- Diet: Dr. Danielle's top recommendation is a paleo-diet that focuses on vegetable intake for fiber and nutrition. Rule of thumb: ½ your plate in veggies each meal. Talk to Dr. Danielle if you need further recommendations.
- Fiber: 30-40 grams daily. Calculate a few days worth of daily dietary intake on an app to see your average fiber intake.
- Coffee: No more than 1-2 cups daily (if desired).
- Smoothies: Daily for optimal nutrition.
- Supplements, All high quality and in their active forms: Multivitamin, Energy B-complex, Fish oil Supreme, Daily Defense Probiotic, Collagen Powder. Consider EndoTrim for those whom are desiring weight management.

If you plan on returning to your regular eating habits, please taper back on in the following way leaving 2-3 days between foods for optimal effects and to minimize digestive disturbances, brain fog and fatigue.
